

FMS DIGITAL CALIPER WITH 2-WAY PRESSURE DEVICE

These special digital caliper are supplied with an aluminium box with cavities for FMS inserts and calibration plates. All FMS measurement inserts fit this caliper.

The 2-way pressure device gives a visible measurement pressure of up to 8N in both directions

This caliper is recommended for companies making threaded components often as there is no need for inserts holders or the standard pressure device. Measurement of external and internal diameters of up to 150mm / 6 inches.
